

# SEO Audit Report

**Site:** https://rocket-ship-plum.vercel.app/ · **Date:** 2026-05-19 · **Business type:** B2B Heavy Industrial Fabrication & Plant Erection

**Business:** Madras Swastic Engineers Pvt. Ltd.

**Founded:** 1998 · **Certification:** ISO 9001:2015 · **Award:** Industry Excellence (2023)

**HQ:** 21-C, 5th Cross St, Guindy Industrial Estate, Chennai 600032 · **2nd facility:** Sriperumbudur (42,000 sq.ft. total)

**Contact:** +91 98841 48474 · md@madrasswastic.com

**Marquee clients:** ISRO, Schwing Stetter, Manali Petrochemicals, Heavy Vehicles Factory, TANCEM, JK Paper

32 / 100

SEO Health Score · weighted composite of 7 categories

Verdict: Critical — site is broken in ways search engines cannot work around.

**Headline:** The business is solid. The website actively undermines it. Four of five navigation links 404, the canonical domain is a random Vercel slug, and there is zero structured data. This is not an SEO audit — it is a recovery plan.

## Score Breakdown by Category

| Category                  | Weight | Score    | Weighted | Status |
|---------------------------|--------|----------|----------|--------|
| Technical SEO             | 22%    | 20 / 100 | 4.4      | Poor   |
| Content Quality (E-E-A-T) | 23%    | 50 / 100 | 11.5     | Mixed  |
| On-Page SEO               | 20%    | 25 / 100 | 5.0      | Poor   |
| Schema / Structured Data  | 10%    | 0 / 100  | 0.0      | Absent |
| Performance (CWV)         | 10%    | 55 / 100 | 5.5      | Mixed  |
| AI Search Readiness (GEO) | 10%    | 31 / 100 | 3.1      | Poor   |
| Images                    | 5%     | 40 / 100 | 2.0      | Weak   |

## Cross-cutting sub-score

**Local SEO: 18 / 100** — real NAP exists in body copy but is absent from machine-readable signals (no schema, no GBP, no citations, no Maps embed). The contact page itself returns 404, so the local conversion path is broken end-to-end.

## Critical Issues — Fix This Week

### CRITICAL 1 Four of five navigation links return 404

`/about` , `/projects` , `/customization` , and `/contact` all return HTTP 404. Every procurement persona abandons the site at the first click. The hero "Start a Conversation" CTA and all five footer social icons also route to `/contact` — every conversion path is dead.

**Fix:** Deploy the inner pages, or as a same-day stopgap, redirect those routes to homepage anchors ( `/#about` , `/#projects` , etc.). Replace the contact CTA with a working `mailto:md@madrasswastic.com` link immediately.

### CRITICAL 2 Canonical domain is a random Vercel slug

`rocket-ship-plum.vercel.app` has zero brand signal, zero backlink equity, and could be reassigned if the Vercel project is renamed. AI engines (ChatGPT, Perplexity, Google AI Overviews) cluster authority around named brand domains — there is currently no path to being cited for "Madras Swastic Engineers."

**Fix:** Register `madrasswastic.com` (or `.in` ) today. In Vercel → Project → Domains, attach the custom domain and mark it primary. Vercel auto-301s from the slug. Update every canonical, `og:url` , and schema `@id` to the new domain.

### CRITICAL 3 `/robots.txt` and `/sitemap.xml` both return 404

AI crawlers (GPTBot, ClaudeBot, PerplexityBot) and Google have no discovery path and no policy signal. The absence of a sitemap also means no clear page inventory once inner pages exist.

**Fix:** Publish both at the root.

```
User-agent: *
Allow: /

User-agent: GPTBot
Allow: /

User-agent: ClaudeBot
Allow: /

User-agent: PerplexityBot
Allow: /

User-agent: Google-Extended
Allow: /

Sitemap: https://madrasswastic.com/sitemap.xml
```

**CRITICAL 4 Zero structured data anywhere on the site**

No `Organization`, no `LocalBusiness`, no `BreadcrumbList`, no `Service`. For a 27-year ISO-certified contractor with ISRO as a named client, this is the highest-leverage missing signal — every other SEO improvement compounds off this baseline.

**Fix:** Deploy a `GeneralContractor` JSON-LD block on every page.

```
{
  "@context": "https://schema.org",
  "@type": "GeneralContractor",
  "@id": "https://madrasswastic.com/#org",
  "name": "Madras Swastic Engineers Pvt. Ltd.",
  "url": "https://madrasswastic.com/",
  "foundingDate": "1998",
  "telephone": "+919884148474",
  "email": "md@madrasswastic.com",
  "hasCredential": {
    "@type": "EducationalOccupationalCredential",
    "credentialCategory": "ISO 9001:2015"
  },
  "address": {
    "@type": "PostalAddress",

    "https://www.indiamart.com/madrasswasticengineers"
  ]
}
```

**CRITICAL 5 No RFQ / vendor pre-qualification path**

The only CTA leads to a 404. No quote form, no downloadable capability brochure, no ISO certificate PDF, no project portfolio. B2B procurement teams cannot self-qualify the vendor and will not email blindly.

**Fix:** Build `/rfq` with structured fields (Project type [Structural Fab / Plant Erection / Piping / Turnkey], Tonnage estimate, Location, Timeline, Message). Publish the ISO 9001:2015 certificate as a downloadable PDF. Add a `/capability-brief.pdf` with crane tonnage, weld capabilities, equipment list.

## High-Priority Issues

### HIGH 6 H1 contains zero target keywords

Current H1: "Engineering Precision for Modern Infrastructure" — brand copy, not a search signal. None of the four target queries appear.

**Fix:** H1 → "Structural Fabrication & Plant Erection Contractor, Chennai — Madras Swastic Engineers". Title tag → "Structural Fabrication Contractor Chennai | ISO 9001 | Madras Swastic Engineers".

### HIGH 7 No meta description, no canonical, no Open Graph tags

Social shares produce generic previews. Duplicate-URL signals between the Vercel slug and any future custom domain are uncontrolled. Twitter/X cards do not render.

**Fix:** Add unique 150–160 char meta description + canonical + full OG/Twitter card metadata on every page.

### HIGH 8 No dedicated service / capability pages

Each capability (Structural Fabrication, Mechanical Erection, Piping & Skid, Turnkey) maps to a distinct high-intent procurement query, but there is no dedicated page for any of them. Competing vendor sites run 2,500–4,000 words across capability and portfolio sections.

**Fix:** Build four service pages, 800–1,200 words each, with material grades (IS 2062, ASTM A36), plate thickness range, weld procedure specs (GTAW/SMAW), NDT capabilities, equipment list (crane tonnage, transport reach), and one named project reference per page.

### HIGH 9 Marquee client claims are asserted, not evidenced

ISRO, Schwing Stetter, and Manali Petrochemicals logos with no project case studies, no scope (tonnage, timeline, location), no client-attributed quote. Logos alone score poorly with both Google E-E-A-T evaluators and AI citation engines.

**Fix:** One 300-word case study per anchor client, formatted as: "ISRO LPSC — 340 MT structural package, delivered 11 days ahead of schedule, August 2023." Include client logo with descriptive `alt` text.

### HIGH 10 ISO 9001:2015 stated as text but never linked

No certificate number, no expiry date, no PDF download, no registrar verification link. Multinational procurement compliance teams (the kind that vet ISRO vendors) cannot proceed past this gap.

**Fix:** Publish the certificate PDF; add `hasCredential1` with the registration number in schema; link from a homepage credibility bar.

**HIGH 11 No named principal / director bio**

B2B industrial vendors need accountable humans. The email `md@madrasswastic.com` exists but no MD name, no engineering qualifications, no GST number, no CIN. Enterprise procurement teams running structured vendor qualification cannot complete this step.

**Fix:** About page with named MD, engineering credentials (AMIE / B.E. Mech / M.Tech), GST number, CIN (from MCA), and ISO certificate registration number.

**HIGH 12 No llms.txt**

Biggest missed AI-search signal. AI engines have no structured entry point to learn what the site is.

**Fix:** Publish `/llms.txt` :

```
# Madras Swastic Engineers
> ISO 9001:2015 certified industrial fabrication and plant erection
> contractor based in Chennai, India. Founded 1998. Clients include
> ISRO, Schwing Stetter, Manali Petrochemicals. 42,000 sq.ft. facility
> in Guindy Industrial Estate.

## Medium-Priority Issues

| Issue                                                | Evidence                                                                                                                       | Fix                                                                                                                                                                                                |
|------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Client logos likely lack descriptive alt text        | Logo images use hashed filenames; client name probably not in <code>alt</code> attribute or adjacent <code>figcaption</code> . | Set <code>alt="ISRO – Indian Space Research Organisation"</code> etc.; add one-line figcaption with project context.                                                                               |
| Stats asserted without methodology                   | "96.4% on-time", "18% cost-saving", "99% safety score" — no source footnote.                                                   | Add a parenthetical source: <i>"across 47 projects 2020–2024, client-acknowledged delivery dates"</i> .                                                                                            |
| Sriperumbudur facility mentioned but never addressed | "2 manufacturing facilities, 42,000 sq.ft. total" — Sriperumbudur location has no published address, no dedicated page.        | Publish the full address; add a second <code>LocalBusiness</code> schema node with <code>branchOf</code> pointing to parent. Sriperumbudur is an auto/manufacturing hub — own those local queries. |

| Issue                                                                     | Evidence                                                                                                                     | Fix                                                                                                                                                           |
|---------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| No IndiaMART / TradeIndia / JustDial / NSIC presence                      | None linked via <code>sameAs</code> . These directories rank above most SME sites for "steel fabricator Chennai" queries.    | Create + claim profiles on IndiaMART, TradeIndia, JustDial, NSIC, MSME Udyam. Link all via <code>sameAs</code> in <code>Organization</code> schema.           |
| Privacy / Terms / Sitemap footer links are <code>#</code>                 | Cosmetic but signals incomplete site to crawlers.                                                                            | Stub <code>/privacy</code> , <code>/terms</code> ; publish real <code>sitemap.xml</code> .                                                                    |
| No project freshness signals                                              | No dated activity feed, no recent-completion callouts on the homepage.                                                       | Quarterly "Recent Projects" list with client + completion month.                                                                                              |
| Vercel preview deployments likely indexable                               | Every Vercel push generates a preview URL; without <code>X-Robots-Tag: noindex</code> , duplicates accumulate.               | In <code>vercel.json</code> , add <code>X-Robots-Tag: noindex</code> header conditional on the <code>x-vercel-deployment-type: preview</code> request header. |
| No Google Maps embed                                                      | Contact area (when it exists) should reinforce the verified GBP Place ID.                                                    | Embed Maps iframe once GBP is claimed.                                                                                                                        |
| KPI stats live in card layouts, not extractable prose                     | Isolated numbers in grid cards are not citable by Perplexity / ChatGPT.                                                      | Add one 90-word "About" paragraph mentioning name + location + cert + clients + stats together — directly citable as a single passage.                        |
| Asset filenames hashed but unknown if responsive <code>srcset</code> used | Build pipeline produces <code>logo-CX-UPfB1.png</code> -style filenames — good for caching, unknown for responsive delivery. | Verify <code>srcset</code> / <code>picture</code> usage on hero + project images; convert key images to WebP/AVIF.                                            |

## Low-Priority Issues

- IndexNow not implemented — push content updates to Bing and Yandex on each deploy.
- No author/publisher attribution or "Last updated" line on any page.
- Footer social icons should point to real LinkedIn / IndiaMART profiles once they exist.
- Security headers ( `Content-Security-Policy`, `Permissions-Policy`, `Referrer-Policy` ) are not Vercel defaults — configure in `vercel.json`.

## 30-Day Recovery Plan

---

### Week 1 — Stop the bleeding

1. Register a custom domain; configure in Vercel; mark primary; verify the auto-301 from the Vercel slug.
2. Deploy `/about` , `/projects` , `/customization` , `/contact` — or stopgap-redirect to homepage anchors until the pages exist.
3. Replace every broken CTA with a working `mailto:` while the contact form is built.
4. Publish `/robots.txt` and `/sitemap.xml` .

### Week 2 — Make the site machine-readable

5. Deploy `GeneralContractor` JSON-LD with full NAP, geo, foundingDate, ISO credential, sameAs on every page.
6. Add canonical, meta description, OG, and Twitter card to every page.
7. Rewrite H1 + title tag with target keywords ("Structural Fabrication Contractor Chennai").
8. Publish `/llms.txt` .

### Week 3 — Vendor-grade content

9. Build four service pages (Fabrication, Erection, Piping & Skid, Turnkey) — 800+ words each with material grades, codes, equipment, tolerances.
10. Build `/projects` with 3+ named case studies (ISRO, Schwing Stetter, Manali Petrochemicals) — scope, tonnage, timeline, outcome.
11. Publish the ISO 9001:2015 certificate PDF; link from a homepage credibility bar.
12. Build `/rfq` form (project type, tonnage, location, timeline, message).
13. Publish the Sriperumbudur facility address; add `branchOf` schema.

### Week 4 — Local + GEO foundations

14. Claim Google Business Profile with primary category "Steel Fabricator". Upload facility + project photos.
15. Create IndiaMART + TradeIndia profiles with exact-match NAP. Link via `sameAs` .
16. Register with NSIC / MSME Udyam; add the verifiable badge to the homepage.
17. Add named MD bio + GST + CIN + ISO registration number on About page.
18. Add the 90-word citable "About" prose paragraph for AI extraction.

## What's Already Good

---

- Real, verifiable NAP visible on homepage (street address, phone, email) — internally consistent across body and footer.
- ISO 9001:2015 + 27-year operating history + zero-LTI safety record = genuine, differentiated trust anchors.
- Marquee client roster is real and rare (ISRO is a defensible differentiator that no competitor can claim).
- Industry Excellence Award (2023) provides a current freshness signal.
- Server-side rendering is confirmed — JavaScript-gated content is not a concern.
- Specific stats present (96.4%, 99%, 42,000 sq.ft., 90+ engineers) — the raw material for AI citation is already in place; it just needs better packaging.

## Audit Limitations

---

- Live PageSpeed / CrUX field data was not measured (no Google API credentials configured). The performance score is an estimate based on Vercel infrastructure defaults; validate with PageSpeed Insights once a custom domain is live.
- Actual Google Business Profile existence, IndiaMART / TradeIndia presence, and live local pack rankings could not be confirmed without DataForSEO or manual platform search.
- Inner-page analysis is worst-case because every inner page returns 404. The four service pages, projects page, and contact page must be re-audited once they exist.
- No competitor benchmarking — gap scores are relative to known SERP norms for B2B industrial procurement queries, not a named competitor set.
